DETAILED ACTION

Election/Restrictions

1. Claims 17-32, 46-55, 69-78 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/26/05.

These claims should be cancelled in the next response.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 33-39, 41-43, 45, 56-60, 62, 64-66, 68 are rejected under 35 U.S.C. 102(e) as being anticipated by Yogeshwar et al U.S. Patent Number 6,947,598.

Re Claims 1, 4, 33, 36, 41, 56, 59, 64, 65, fig. 9 teaches a device that includes a interface 904 (a network interface) that uses Internet Protocol (establishing a communication link...network) to delivery data to a end user (See col. 2, lines 2-10); a CPU 902 (a processor) coupled to the interface wherein the CPU (a processor) performs archiving of audio data packets according to fig. 1 wherein step 106 receives audio data; step 122 generates IAF file with metadata and indexing information for a

Art Unit: 2663

portion of the receive audio data and stores on archive media (a memory) the step 116 (See col. 9, lines 5-65) wherein IAF files are associates with portions of audio data (a second/third portion of the voice data... subsequent... portion).

Re Claims 2, 5, 34, 37, 38, 42, 57, 60, refer to Claim 1.

Re Claims 3, 6, 35, 39, 43, 58, 62, 66, refer to Claim 1, wherein the end user retrieves archive information by sending tagging input and received at the device of fig. 9 (See col. 19, lines 23-48).

Re Claims 45, 68, refer to Claim 1, first and second metadata are associated/stored in archive media as the same streaming data (a single arrangement)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7-16, 40, 44, 61, 63, 67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yogeshwar et al U.S. Patent Number 6,947,598.

Re Claims 7, 11, 12, 61, refer to Claim 1, Yogeshwar teaches that audio data can be received over the Internet. It is known that IP telephone is supported by the Internet standard. One skilled in the art would have been motivated to modify the device of fig. 9 to support storage and retrieval of VOIP data. In so doing, end user retrieves IP voicemail.

Art Unit: 2663

IP telephones have microphone for receiving local voice inputs, a codec (a signal processor) for converting local voice input and speakers for converting the retrieved voice data into sound.

Re Claims 8, 9, 13-16, 40, 44, 63, 67, refer to Claim 7, wherein the IP telephone has at least one key for tagging input associated with DTMF one (See col. 19, lines 23-48).

Re Claim 10, one skilled in the art would have motivated to use soft key for ease of selecting a intended function on the IP telephone.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
